

AcornPipe - How to Order More Drawings

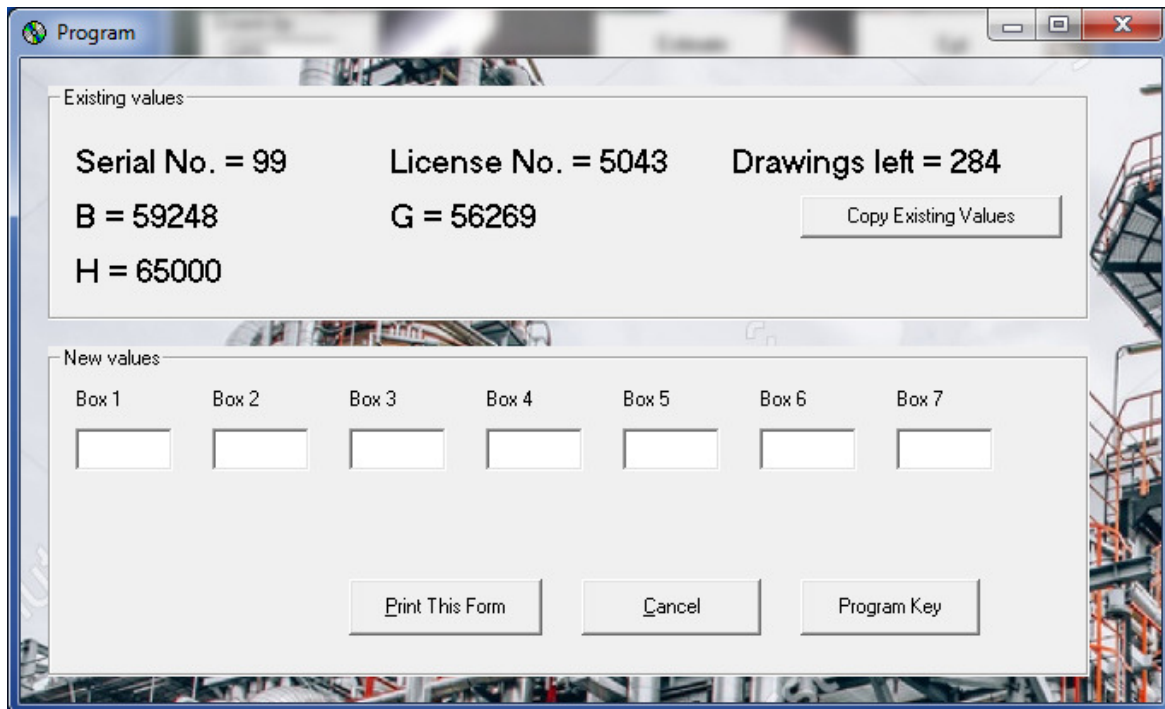

AcornPipe is normally supplied with 100 drawing counts already programmed into the key. You can practice drawing with as little as one drawing count left in the key, provided you do not save any drawings.

You can minimize the number of counts consumed during practice by opening an existing drawing and modifying it, rather than starting a new drawing each time.

To order more drawings, select Help/Program more drawings as shown.

The Program window appears:

This window contains the information needed to allow Mitre Software Corporation to issue more drawings for your key. Press Alt-PrintScreen to copy the window. Then paste the window into an email to acornpipe@gmail.com or info@mitresoftware.com and specify how many drawings you are ordering. Usually a P.O. Number is acceptable. It is also possible to use visa or master card. If it's your first time or you need help, call 1-780-434-4452.

When drawings are issued, you will be provided with codes to enter into the boxes on the Program form as shown below. The codes you receive will look something like this:

E770 2F0D 4866 A3D5 4AE3 DACD D66E

The screenshot shows a window titled "Program" with the following content:

Existing values

Serial No. = 99 License No. = 5043 Drawings left = 284

Program Key

Shortcut: If you paste all the characters here, all seven boxes will usually populate.

After entering or pasting the codes, select Program Key. You will need to exit AcornPipe and relaunch it to use the new drawing counts.
